THIS the concluding portion of the letter S comprises 4935 Main words, 960 Combinations explained under these, and 2417 Subordinate entries; in all 8312. The Obvious Combinations, illustrated by quotations but not requiring specific definition, number 1094 more, making a total of 9406. Of the Main words, 1133 are marked † as obsolete, and 208 are marked || as alien or not fully naturalized.*

The Germanic element in this portion of the English vocabulary amounts to somewhat less than a quarter. It includes *such, suck, summer* (the season), *sun, sunder, sundry, sup* (to sip), together with all but a few of the words with initial *sw*, which occupy about two-thirds of the whole space covered by the Germanic element. Among the more important *sw*-words belonging to the ordinary written and spoken language are *swaddle, swain, swallow, swamp, swarm, swarthy, swath, swathe, sway, swear, sweat, sweep, sweet, swell, swelter, swerve, swift, swill, swim, swindle, swine, swing, swinge, swirl, switch, swoon, swoop, sword*; but there are many now obsolete, dialectal, technical, or otherwise restricted in use, which equal or surpass these in lexicographical interest or difficulty: such are the six words *swab*, the seven nouns *swad*, the three nouns *swale, swalper, swanimote*, the five words *swarf*, the seven words *swarth, swarve*, the seven words *swash*, the three nouns *swash* and *swatch, swats, sweal, sweb, swedde, sweek, sweer, swelt, swerk, sweven*, the six words *swig, swilk, swimble, swime, swingle, swipe, swipper, swire, swith, swithe, swithen, swither, swive, swote, swound, swow*.

In the Latin and Greek element of the vocabulary the most striking feature is the number and importance of the prefixes that have required more or less lengthy treatment; these are *sub-* (with its variants *su-, suc-, suf-, sum-, sup-, sur-, sus-*), *super-, supra-, sur-, syn-* (with its variants *sy-, syl-, sym-, sys-*). The great majority of the words from Latin, Greek, and French are compounds of one or other of these prefixes, and the list of them includes many of common literary and colloquial currency, and many of considerable rank in the terminology of the arts and the sciences.

India has supplied an unusually large proportion of words: *subah, subahdar, subashi, subjee, sudder, Sudra, sundri, sungar, sunn, sunnud, sunnyasee, supari, surnai, surpeach, surwan, susu, sutra, suttee, suttoo, swadeshi, swami, swastika*.

A few articles may be singled out as being especially conspicuous for their etymological interest: *subdue, sugar* and *sugar-candy, surd* (in mathematics), *surlly, sway, swerve, swindle, sycophant, syllabus, syphilis*, and the Paracelsian *sylph* and *synovia*. Special interest attaches to the facts of the history of *syllabus*.

The original collection of material for *Su—Sz* was subedited by Mr. P. W. Jacob in 1883; since then a large body of additional quotations had been amassed before the regular staff started work upon it at the beginning of 1914. The proofs have been read by the Misses Edith and E. P. Thompson, Lansdown, Bath, Mr. G. F. Friedrichsen, M.A. (a former member of the late Sir James Murray's staff), and the Rev. Canon J. T. Fowler; their annotations have contributed in many instances to the accuracy or completeness of the treatment. Constant assistance in verification at the British Museum has been given by Mr. W. W. Jenkinson, and on several occasions Mr. E. J. Thomas, of the University Library, Cambridge, a former member of the Dictionary staff, has rendered similar service.

On many technical points recourse has been had to experts, who have generously placed their knowledge and their time at the service of the Dictionary. Among these the following have furnished special information: the late Prof. A. S. Napier, Mr. W. H. Stevenson, and Mr. K. Sisam, on the early history of some native words; Prof. D. S. Margoliouth and Dr. A. E. Cowley on questions of Semitic etymology; Dr. James Morison on the languages and lore of India; Mr. C. C. J. Webb on several philosophical terms; the

The progress of this portion of the Dictionary has been retarded by the withdrawal in succession of several members of the staff, and, in the second half of the year 1918, of the editor, for war service of different kinds. The assistants to whom has fallen the chief share in the preparation of *Su—Sz* are Mr. A. T. Maling, M.A., and Mr. F. J. Sweatman, M.A., and the Misses Elsie M. R. and Rosfrith N. R. Murray, all members of the late Sir James Murray's staff. Others who were engaged upon it for longer or shorter periods are Mr. J. W. Birt, Mr. P. T. J. Dudley, Mr. W. J. Fortune, Mr. H. R. Simpson, Mr. F. A. Yockney, and the late Mr. James Dallas.

10. *Math.* Compounded with adjs. expressing ratio, *sub-* denotes a ratio the opposite of that expressed by the radical element, as in L. *subduplus* SUBDUPLUM, *subtriplus* SUBTRIPLE, late L. *submultipus* SUBMULTIPLE; e.g. *subdecuple* = denoting the ratio 1 to 10, *subdouble* = SUBDUPLUM, *subnovitripartient* = 1 to 9, i.e. 8. 75, *subsesquialter* = 3 to 4, *subsuperparticular*, etc. Analogously, in SUBDUPLICATE, etc. the prefix is employed to express the ratio of the square (etc.) roots of quantities; but these compounds have been sometimes erroneously used for *subduplex*, etc. (cf. quot. 1657 below).

This use is modelled (in late L.) on that of Gr. *υπο-*, as in *υποδιπλασιος*, late L. *subduplus* Ratios of this kind were called *υπολογος*, the opposite *πρόλογος*, *υπο-* app. expressing the notion of 'proportion of lesser inequality'. (Another arithmetical use of the Greek and Latin prefixes is une-

presented in Eng.; viz that exemplified in *υποτριτος*, L. *subtertius*, lit. 'a third less', i.e. denoting a ratio 2/3, i.e. 2 to 3.)

1. The name of an order of ministers in the Christian church next below that of deacon

The duty of subdeacons is to assist in the celebration of the Eucharist by preparing the sacred vessels and (in the Western Church) by reading the epistle. In the East the subdiaconate ranks as one of the minor, in the West as one of the major orders; it does not exist in the Church of England.

ME. *sodewe*, *subdewe*, *-dew*, represents formally AF. **soduer*, **sib'duer* = OF. *so(u)-dure*, *su(d)uire*, etc. (used with the meanings of L. *seducere*) to deceive, seduce = OIt. *soddiurre* :- L. *seducere* to draw up or away, withdraw, remove by stealth, purge, evacuate, calculate (see SUBDUCE, SUBDUOT). Neither L. *seducere* nor OF. *soddiurre* is recorded in the sense of 'subdue', so that it is to be presumed that the AF. form took over the sense from L. *sudde*, the pa. ppl. of which is represented in Eng. by SUBDUIT from c1375.

There is no clear connexion in form or sense with the AF. *subdus* of Edw. III stat. 11 c. 17, ann. 1353; the meaning is app. 'attached' or 'arrested', not 'subdued'. The 15th c. AF. *subduer* (Littellton *Int.*, ed. 1526, A vj b) was prob. modelled on the current Eng. form.]

H. BRADLEY *Princ. Logic* 14 We shall see that the subject is in the end no idea but alway, reality.

b. The term or part of a proposition of which the predicate is affirmed or denied.

Logice* 178 The proposition bath two parts, the Subject, and Predicate. 1697 tr. *Burgersdicius his Logic* i. xxvii 109 Simple enunciation consisteth of a subject and a predicate. 1796 NITSCH's *View Kant's Princ* 128 Collections of properties, which in a judgment are made the predicates of a subject. 1843 MILL *Logic* i § 2 The subject is the name denoting the person or thing which something is affirmed or denied of. 1870 JEVONS *Elem. a 1638 [see PREDICATE sb. 2] 1733 J. CLARKE *Gram. Lat Tongue* 68 note, The Nominative Case to a Verb, is called by Grammarians the Subject of the Verb. 1751 J. 9. *Modern Philos.* More fully conscious or thinking subject. The mind, as the 'subject' in which ideas inhere; that to which all mental representations or operations are attributed; the thinking or cognizing agent; the self or ego. (Correlative to OBJECT sb. 6.)

The tendency in modern philosophy after Descartes to make the mind's consciousness of itself the starting point of enquiry led to the use of *subjectum* for the mind or ego considered as the subject of all knowledge, and since Kant this has become the general philosophical use of the word (with its derivatives *subjective*, etc.).

[The following quotes illustrate a transitional use.] 1688 RUST *Disc. Truth* xviii, Thus have we spoken concerning the truth of things, or Truth in the Object. It follows that we speak concerning Truth in the power, or faculty, which we call Truth in the Subject. 1697 NORRIS *Acc. Substitutionalism (*sobstitushənäliz'm*) [*f.* prec. + -ISM.] (See quot.) Hence **Substitutionalist**.

1908 C. A. Strong in *Ess in honor of W. James* 171 The present experience does not intuit the past experience. It is a more or less perfect reproduction of it. It earns its title to be a memory by serving as a satisfactory substitute for the object in the regulation of conduct. We may call this the substitutional theory of knowledge, or, more briefly, substitutionalism. *Ibid.* 180 From this maze of misconceptions, the substitutionalist is saved by his insight that the proper thing to be called experience is not an experience projected into the place of another experience but an experience simply.

Substitutionary (*sobstitushənārī*), *a.* [*f.* as prec. + -ARY] = SUBSTITUTIONAL.

The OE. *swealc* and *swealc* represent primitive **swaliko* and **swuliko* respectively, the latter being an analogical formation on **hwiliko* — WHIOH; cf. OE. *hwile* beside *hwile* (← **hwiliko*), and Goth. *hwileiks*. Evidence for the rounding of *swealc* to *swealc* appears late in the 9th c., and a sporadic spelling *swealc* is found from c 1000. *Swealc* and *swealc* became in ME *swulch*, *swulch*, which, by the absorption of *w* and loss of *l*, gave *such* (in ME written also *soch*), the modern standard form. The dropping of *w* was carried through into the other types *swealc* and *swealc*, whence the widespread dial. forms *sech* and *sich*. Thus, and by similar cross-influences, a large variety of forms arose, which can be grouped according to (1) the quality of the vowel, (2) the retention or loss of *w*, (3) the retention or loss of *l*, as well as (4) the palatalization or non-palatalization of *c*. The unpatalized forms SWILK and SIO (*sweik*, *swik*, *sik*, etc.) are treated separately in their alphabetical places.

The vocalism of the continental forms is in many points obscure. Some of them indicate the possibility of there having been new formations distinct from the original types, and there has no doubt been interaction of the forms of WHICH, the development of which, presumably on account of the difference of the initial sound, has not been entirely parallel.]

B. Signification.

Such is a demonstrative word used to indicate the quality or quantity of a thing by reference to that of another or with respect to the effect that it produces or is capable of producing. Thus, syntactically, *such* may have backward or forward reference; in the uses of branch I it has the former, in those of branch II mainly the latter.

The use of *such* and *such a* in the attributive position is illustrated in detail only in sense I, but the same rules apply to the adj. generally; for special uses see branch IV.

I. 1. Of the character, degree, or extent described, referred to, or implied in what has been said.

prefixed article *assukkar*, whence Sp *azucar*, Pg. *assucar*). The phonological history of the Eng. forms is in several points obscure. (1) The *g* of the modern form (see *y*-forms below) cannot be accounted for by any known OF. or AF. forms (but med.L. *sugurum* occurs); cf., however, AF. *segerstaine*, Norman F. *segristem* = OF. *secrestium* (see **SEXTON**), and Eng. *flagon* representing F. *flacon*. (2) The quantity of the vowel of the first syllable appears to have been variable from early times (cf. the spellings *sugur*, *sawger*, *seukere*, and *suggur*), but the development of initial (*s*) into (*f*) makes it probable that the long *ū* prevailed (cf. *sūre*), and that shortening took place afterwards; (*sū*-*g*) survives in some north midl. dialects (3) The *Sc* forms (*δ*) pronounced (*səkər*) show a survival of the short vowel type from F. (*sukr*), but LG. influence is also possible.

The relation of Arab *sukkar* to Gr *σάκχαρος*, *sákcharon* (whence L. *saccharon*, *SACCHARUM*, Pers *shakar*, Skr *śakarāṇī* [Prakrit *sakharā*] ground or candied sugar, orig pebble, grit (cf. JAGGERY), is not clear. Forms representing one or other of the types are found in most European languages e.g. MLG *sucher*, MDu *sucher*, *suker*, *sugker* (mod Du *sukker*), OHG *sucwra* (MHG *encher*, G. *zucker*), Icel *sykr*, MSw. *söcker*, *sucker* (Sw *söcker*, Da *sukker*), Lit Russ *cukor*, Serb. *cukar*, Boh *cukr*, Pol *cykier*, Turk *sukker*, Rum *sahkar*, Russ *sakhara*, Serb *šećer*, *čahara*, *čakara*, Bulg *šećer*, *sahar*, Turk *şeker*.)
